Summary

Experienced Database Developer with 2 years of hands-on experience in MySQL, Teradata, and Informatica PowerCenter. Proficient in writing efficient SQL and BTEQ scripts, optimizing ETL workflows, and managing data pipelines. Skilled in troubleshooting complex issues, monitoring job schedules using Control-M, and ensuring high system availability. Adept at performance tuning, root cause analysis, and maintaining seamless operations for business-critical data processes.

Skills

Databases:

MySQL | Teradata | BTEQ Scripts | SQL

ETL & Data Processing:

ETL Development | Apache Airflow | Data Transformation | Batch Scheduling | Data Automation

Programming & Scripting:

Python | Pandas | Unix Shell Scripting

Tools & Technologies:

Data Engineering | Automation | Performance Tuning

Experience

Associated Software Engineer

Carelon Global Solutions

Bangalore, India 09/2023 - Current

- Built and managed database solutions using **MySQL** and **Teradata**, helping to keep data accurate, available, and performing well.
- Developed and maintained **ETL processes** with **Informatica PowerCenter** to move and prepare data for reports and analysis.
- Developed and optimized SQL and BTEQ scripts for data extraction, transformation, and validation, enhancing data processing speed and reliability.
- Set up and managed job schedules using **Control-M** to automate ETL tasks, database backups, and daily data jobs.
- Collaborated with cross-functional teams to troubleshoot issues, enhance system performance, and ensure the reliability of end-to-end data workflows.
- Optimized ETL job runtimes and resource usage by analyzing job logs, query performance, and system bottlenecks.

Education

Bachelor of Technology

Siksha 'O' Anusandhan University

Odisha, India 08/2019 - 12/2023

- Computer Science and Engineering

Projects

- Database Development Project:**
 - Objective:** Design, develop, and maintain database systems and ETL workflows to ensure high performance, data integrity, and availability in MySQL and Teradata production environments.
 - Role:** Database Production Developer Engineer (L1)
 - Tools Used:** MySQL, Teradata, Informatica PowerCenter, BTEQ, SQL, Control-M
 - Outcome:** Achieved high database reliability by optimizing MySQL and Teradata systems, resulting in 99.9% uptime and a 20% reduction in downtime. Streamlined data processing by identifying and addressing performance bottlenecks, improving system response time by 15% and enhancing overall workflow efficiency.

Certification

- The Ultimate MySQL Bootcamp - Udemy:** Completed hands-on MySQL course covering SQL queries, joins, subqueries, indexing, data manipulation, and real-world database project implementation.
- Informatica - Udemy:** Completed practical training in Informatica PowerCenter covering ETL processes, workflow creation, data transformation, debugging, and end-to-end data integration projects.

Others

- Bronze Award, College Hackathon (04/2022)**
Achieved 4th place for developing an innovative action game project, demonstrating strong teamwork and technical skills.
- Certificate of Dance Competition (02/2023):**
Won top honors in a competitive dance event, showcasing excellence and dedication to performance.
